Nice chatting with you.

Case ID: 102829546899

Here's the transcript of your chat with Apple Support:

Apple
Thanks for contacting Apple Support. Please give me a moment to look over the information you have provided.

Apple
Hello, thank you for contacting Apple Support. I see you are contacting regarding Bluetooth, is that correct?

Suraj Satyarthi
yes

Apple
Would you please provide me more details about your situation?

Suraj Satyarthi
So in order to login to any Google account, we have an option to scan a paaskey QR code to do that one has to connect their phone with a MacBook via Bluetooth. I am unable to establish that connection, but the same thing is working fine in my older MacBook 2017.

Apple
Okay

Apple
Did you receive an error message?

Suraj Satyarthi
No only the connection times out and I get a message on Google account. Login page that I should try again or try a different method

Apple
I understand!

Apple
So the Mac doesn't recognize the iPhone at all?

Suraj Satyarthi
It is not iPhone. It's an android phone. This MacBook doesn't, but the other MacBook 2017 does. Also based on my analysis. bluetoothExternalDongleFailed — The kernel repeatedly threw this error during proximity handshakes with your phone.
[com.apple.bluetooth:Stack.LE] Invalid size 68 for serviceData — The bluetoothd daemon could not parse standard BLE advertising data from your mobile device.
Failed to parse AD response with error STATUS 4057 — The Bluetooth LE stack failed to complete the cryptographic handshake required for Passkey/QR code pairing.
In plain terms: The physical Bluetooth controller chip embedded in the MacBook's M4 SOC was failing to correctly process standard BLE proximity handshake packets. This is a hardware-level silicon defect, not a software or pairing issue — consistent with the broader pattern of multi-subsystem failures (GPU, CPU power controller, audio DSP) all pointing to a defective logic board.

Apple
Thank you for the information!

Apple
Can you show me the error message?

Suraj Satyarthi
How do you mean the logs because there is no error message that connection window clocks out, I can provide you the logs which I fetched

Apple
No, it is okay

Apple
Let's see if we can connect it

Apple
I understand your concerns. I'll be more than glad to assist you today regarding your Mac bluetooth

Apple
Before we start I would like to ask you some questions to get more details about your situation, then we will proceed with some steps. At the same time I will research from my resources to locate the best resolution possible for you.

Apple
Did you try to restart both devices?

Suraj Satyarthi
Yes, I started facing this issue few days back. Since then my MacBook has been factory reset twice by Apple support once at the service centre and once remote, I have shut down and restarted this MacBook multiple times. I already have a ticket regarding sudden restart and sudden shut down.

Apple
Okay, but since then the Mac have been working as expected?

Apple
May I know your Mac serial number please?
Serial Number:
Apple menu in the upper left corner of your screen > About This Mac > Serial number

Suraj Satyarthi
DJ31J7MLJ4 no, after the reset, Mac has restarted again, and the Bluetooth issue is persistent

Apple
Okay, thank you for letting me know

Apple
Do you have issues connecting other devices?

Apple
Via bluetooth?

Suraj Satyarthi
I do not see an option to select Bluetooth issue for my visit tomorrow to Apple Centre

Suraj Satyarthi
Bluetooth earphone, and speaker are connecting fine

Apple
Okay, so did you make an appointment to check your device?

Apple
Thank you

Suraj Satyarthi
I am get an appointment for tomorrow regarding the restart issue

Suraj Satyarthi
Have used to add this Bluetooth issue, but there is no option to add it. It only shows chat and phone call suppor

Apple
Don't worry, we are here to help you

Apple
May I know your Mac macOS version please?
macOS Version:
Apple menu in the upper left corner of your screen > About This Mac > macOS

Suraj Satyarthi
26.3 (25D125)

Suraj Satyarthi
1. Bluetooth Peripheral Manager not powering on (Feb 23, 2026 — after all repairs):
2026-02-23 11:17:46.775469+0530 bluetoothd[378]:
[com.apple.bluetooth:WirelessProximity]
ObjectDiscovery -[WPDObjectDiscoveryManager updateAdvertiser] updated with error:
Trying to update advertiser but peripheral manager isn't powered on
2026-02-23 11:17:46.775487+0530 bluetoothd[378]:
[com.apple.bluetooth:WirelessProximity]
Advertising failed to start with error: Error Domain=WPErrorDomain Code=26
"Trying to update advertiser but peripheral manager isn't powered on"
2026-02-23 11:17:46.775488+0530 bluetoothd[378]:
[com.apple.bluetooth:WirelessProximity]
Advertising failed to start for client type 18 with error:
Trying to update advertiser but peripheral manager isn't powered on

Apple
Thank you so much

Suraj Satyarthi
2. Bluetooth Cloud Services connection failure (Feb 20, 2026 — right after factory reset):
2026-02-20 04:17:24.315328-0800 bluetoothd[131]:
[com.apple.bluetoothcloud:BTRootCloudServicesClient]
Failed to fetch sound profile, kConnectionErr
(Unable to establish connection to Bluetooth Cloud Services)

Suraj Satyarthi
Even after the OS factory reset, the Bluetooth peripheral manager is failing to power on (peripheral manager isn't powered on — WPErrorDomain Code=26). This is not a software or iCloud configuration error — it is the hardware BT controller on the SOC failing to initialize. This log was captured on February 23, 2026, after the device was returned from the authorised service centre. The defect persists post-repair.

Suraj Satyarthi
Two different Bluetooth roles, only one is broken.
Bluetooth has two distinct operating modes on any device:
Central Scans for & connects to other devices WORKING
Peripheral Advertises itself so others can find it BROKEN

Apple
Okay, we can try to run a diagnostic on your Mac, to see if we get more information

Apple
Sounds good?

Suraj Satyarthi
Yes

Apple
Perfect, let's do it! Just a moment, I will check the steps

Apple
Are you contacting us from the same Mac?

Suraj Satyarthi
Yes, the same Mac for which I have provided the serial number and has restart iss

Suraj Satyarthi
issues

Apple
Okay, thank you

Apple

We might need to do some steps that could disconnect our chat, but no worries at all. In case the chat get disconnected you can chat us back using this reconnection link: https://getsupport.apple.com/caselookup
. This is your Case ID: (102829546899) Please when you contact us back try to use a different device to avoid disconnections. Let me provide you the instructions:

Apple
We are going to look at this article:
Use Apple Diagnostics to test your Mac

Apple
Please open the article and follow the steps for "Apple silicon"

Apple
Please after you complete the diagnostics, contact us to evaluate the results

Apple
I would like to know if you have any other question about this process?

Suraj Satyarthi
Please give me a moment to check this article if I need your help to start

Apple
Sure! Don't worry

Suraj Satyarthi
This will require remote support. Are you going to provide that?

Apple
No, this is a diagnostic that you can run on your Mac, you don't need to contact us to run the diagnostic, you can do it by yourself
We just need that when you complete the results contact us to check if there's any issues on the bluetooth connection or other hardware or software components

Apple
We will assist you

Suraj Satyarthi
Last time, I ran it. It said waiting for Support. How do I make sure I am running it in off-line mode. I hope you understand my doubt.

Suraj Satyarthi
If asked to review terms and conditions, you might be given the option to run diagnostics offline. I wasn't given this option. When I ran it last today evening.

Apple
In this case and to be able to run the diagnostic you will need an internet connection

Suraj Satyarthi
I have Wi-Fi connection. Let me give it a try. I will make a video if I face any issue, and I will connect with you after 15-20 minutes.

Apple
Sure! Thank you so much

Apple
Let us know how it goes

Apple
Just to let you know, we did the right steps to find the best resolution possible accordingly to Apple procedures.
I completely understand that more steps are needed to resolve the situation. May I know if you have any doubt or questions for now?

Suraj Satyarthi
No, not right now

Apple
Okay, perfect! Thanks for letting me know

Apple
Go ahead and we will wait for you

Sincerely,

Apple Support
